

List of spatial clusters of ARIMA associations between number of fires and cancer incidence by types with regression coefficients and p -values with statistical significance $\alpha = 0.1$ and $\alpha = 0.05$ after Holms-Bonferroni correction

Spatial region (pooled AU)	Type of cancer/ age group/ regression coefficient	P-value	Time lag with fires (years)	Pooling method of time series
	Leukemia			
	Children 0–14 years			
Kh_Pr_Skh	-0.00078	0.0329	2	mean
